

A stylized illustration of a web developer sitting at a desk, working on a laptop. The developer is wearing an orange long-sleeved shirt and dark pants. The desk is cluttered with various tech-related items: a large monitor, a laptop, a small potted plant, and a server tower. In the background, there are several floating windows and icons representing different web technologies: PHP, CSS, HTML, and a code editor showing HTML code. The overall color scheme is dark with orange and white accents.

1. List out the features of HTML5
2. What are HTML Entities? List out 5 commonly used HTML entities.
3. Define accessibility in the context of web development. Discuss why it's essential to create accessible websites and how it benefits different user groups
4. List any 3 ways which help us in improving the accessibility of HTML
5. Create a web page that highlights the features of HTML5. Use appropriate semantic tags to structure the content and showcase at least three key features of HTML5 with explanations.
6. Create a simple web page which has a table. The table must have 2 columns HTML and HTML5. The table should include a minimum of three rows describing the differences between HTML and HTML5.
